Keywords: Traditional Chinese medicine, Ideological and political course, Practical teaching, Innovation

Abstract: Practical teaching is one of the important contents of ideological and political theory teaching reform in higher vocational colleges of Traditional Chinese medicine, and it is also the weak link of ideological and political course teaching in higher vocational colleges of Traditional Chinese medicine. The innovative research on practical teaching of ideological and political course in higher vocational colleges of Traditional Chinese medicine aims to strengthen the cultivation of students in higher vocational colleges of traditional Chinese medicine by building a new platform for practical teaching of ideological and political course in higher vocational colleges and exploring new ways of practical teaching of ideological and political course.

1. Introduction

At present, there are some problems in the higher vocational students of Traditional Chinese medicine, such as deviation of values, low awareness of political participation and weak ability to resist setbacks. As a compulsory public course in national colleges and universities, Under the background of new era and new situation, how to reform and innovate the ideological and political theory course to give play to the pertinence and effectiveness of teaching has always been the academic hot spot in the field of ideological and political education theory research.[1] Through literature research, most of the research hotspots in higher vocational colleges are mainly employment-oriented and pursue the improvement of practical ability.[2-3] Constructing a scientific and comprehensive practical teaching system of higher vocational colleges with strong adaptability is the main way to solve the contradiction between the current curriculum setting and talent training mode of higher vocational colleges of Traditional Chinese medicine and the social needs . It is an effective way to cultivate new application-oriented talents meeting the market demand, and also the focus of the teaching research and practice of TCM higher vocational colleges in the new century.[4-7] The innovative research on practical teaching of ideological and political course in higher vocational colleges of Traditional Chinese medicine aims to grasp the law of ideological and political education, make full use of new opportunities, and improve the practical effect of ideological and political education by building a new platform for practical teaching of ideological and political course in higher vocational colleges and exploring new

approaches to practical teaching of ideological and political course.

2. The Significance of Innovative Research on the Practical Teaching of Thought Course in Higher Vocational Colleges of Traditional Chinese Medicine

The requirement on students' ideological and political education in the report of the 19th National Congress points out the direction for the construction of ideological and political course in higher vocational colleges of Traditional Chinese medicine. Strengthening practical teaching of ideological and political course plays a very important role in meeting the needs of personnel training and improving the teaching effect of ideological and political course in higher vocational colleges. General Secretary Xi Jinping has pointed out that to do ideological and political work well in colleges and universities, it is necessary to adapt to events, advance to The Times and renew to the current situation. We should follow the law of ideological and political work, the law of teaching and educating, the law of student growth, and constantly improve the work ability and level. We should speed up the building of a system of disciplines and teaching materials for philosophy and social sciences with Chinese characteristics, introduce more high-level teaching materials, innovate the system of academic discourse, establish an authoritative, open and transparent evaluation system for achievements in philosophy and social sciences, and strive to build an all-round, all-dimensional and all-factor system for philosophy and social sciences. In recent years, with the change of the international situation and the trend of deepening the reform comprehensively in China, the environment, task, content, channel and object of practical teaching of ideological and political course in colleges and universities have undergone great changes, and a series of new situations and problems have appeared. The objective situation requires that the practical teaching mode of ideological and political course in colleges and universities must be explored in line with the characteristics of our school, and the practical teaching mode of ideological and political course in colleges and universities must be explored to improve the pertinence and effectiveness of the practical teaching of ideological and political course.

3. A New Platform for Innovative Research of Ideological and Political Course Practice Teaching in Higher Vocational Colleges of Traditional Chinese Medicine

TCM education courses in higher vocational college practical teaching should be based on the circumstance, relying on local rich culture and features, will be incorporated in teaching. It highlights the cultivation of ideological and political literacy in professional education, breaks through the narrowness of students' mastery of cultural knowledge and professional skills in the traditional sense, and explores the operational system of cultivating students' patriotism in the new era of TCM vocational colleges. The ideological and political course in higher vocational colleges of Traditional Chinese medicine should start from the aspects of "medicine as benevolence and art, virtue as teacher and great medicine as sincerity", focus on the fundamental task of cultivating people with morality, attach importance to aesthetic education, teach students according to their ability, follow the law of physical and mental development of students and the law of practical teaching, and carry out the practice teaching research of ideological and political theory course innovatively. By offering rich and high-quality practical courses and implementing curriculum-based management of practical activities, it is necessary to improve the practical teaching of ideological and political courses and strengthen the mutual integration and innovative training mode between the practical teaching of ideological and political courses and other courses of traditional Chinese medicine to establish a network resource sharing platform for practical teaching of ideological and political course, to explore the application of virtual practice teaching in college ideological and political course teaching practice and students' social practice. The first

is to use Internet technology to form a virtual practice teaching website of “Ideological and Political course” in colleges and universities, which is a resource sharing platform centered on curriculum construction and community sharing, and integrates digital resource management and production on the basis of fully deconstructing the knowledge. Second, the content on the website includes the teaching management standard of the main board, the release of teaching tasks, teachers' teaching videos, relevant teaching software downloads, cases, student work achievements display area, student score record and query, etc. Thirdly, in terms of functions, accurate community interaction should be reflected, and discussion boards of ideological and political courses and practical policies should be added, so that online discussions and exchanges can be conducted between teachers and students and between students at any time. Fourth, build a virtual simulation training platform. Students are given virtual simulation experience, so that students can experience the hardships of the revolutionary war, strengthen their understanding of the new Chinese history, so as to better understand the spirit, learn from the Red Army to forge ahead bravely and not to be afraid of difficulties. It is to give full play to regional cultural characteristics, carry out cooperative education mechanism, and improve the management mechanism of ideological and political course practice teaching.

4. A New Approach to Innovative Research of Ideological and Political Course Practice Teaching in Higher Vocational Colleges of Traditional Chinese Medicine

4.1 In Terms of Teachers

First, it is to explore the real connotation of ideological and political practice and its influence on students' life in medical colleges in the new era. Second, it is to explore the methods and strategies for cultivating students' positive and healthy ideological and political literacy in higher vocational colleges of Chinese medicine. Third, it is to promote teachers engaged in ideological and political education to constantly strengthen their learning, improve their own theory and professional knowledge, enhance their theoretical level, to explore and implement more effective ideological and political education strategy research methods. Fourth, it is to discuss many problems in teaching practice, make them reasonably and moderately combined with professional skills, and put forward some concrete implementation plans.

4.2 In Terms of Students

Firstly, starting from the talent training mode of the higher vocational colleges of Traditional Chinese medicine in the new era and combining with the majors of students, teachers should deepen the students' new understanding of ideology and politics and strive to improve their ideological and political quality. Secondly, it is to improve the ideological and political courses of higher vocational colleges of Traditional Chinese medicine in the new era, to enhance the ideological and political quality of students in higher vocational colleges of traditional Chinese medicine, and to cultivate professional talents in the medical and health industry with strong comprehensive quality and working ability. Thirdly, it is to open up more practice bases to experience ideological and political affairs, let them know more about the influence of ideological and political affairs in our life and study, and learn more excellent examples of ideological and political affairs, so as to promote the healthy development of students physically and mentally. Fourthly, it is to promote the harmonious and healthy development between teachers and students, and let students feel their ideological and political beliefs in practice. At the same time, teachers' guidance is more targeted and instructive, helping students feel the true connotation and significance of patriotism in a harmonious, healthy and beautiful atmosphere, and promoting the

construction of a positive campus culture.

4.3 In Terms of Security

Strengthening the organization and leadership of ideological and political course practice teaching construction, concentrating on institutional improvement, increasing financial input, and improving the evaluation system of practical teaching and strengthen supervision will lead the ideological and political course practice teaching construction into the whole process of school education in all aspects, better guide young medical students to be enterprising, responsible, hardworking and determined to serve the country.

The research makes students remember the suffering years of oppression and aggression, the heroic deeds of the revolutionary ancestors who shed blood and died for new China, the days when our Party led the whole nation in arduous struggle, and the truth proved by history that there would be no New China without the Communist Party. It makes young college students put their firm belief in Marxism, communism, and socialism with Chinese characteristics throughout their life and study, keep in mind the entrusts of General Secretary Xi Jinping, firmly grasp the nature of contemporary patriotism, adhere to a high degree of unity between patriotism and love of the Party and socialism, strive for self-improvement on the road of pursuing dreams, to struggle as a habit to develop, to struggle as a quality to cultivate, let youth and responsibility together, let struggle and shoulder together.
