Keywords: Red Ship Spirit, first class, second class, online teaching, offline teaching

Abstract: As one of the cornerstones of Chinese revolutionary spirit, the red ship spirit has profound spiritual connotation. Red Ship Spirit is integrated into foreign language teaching through ideological and political education, because it is highly compatible with the ideological and political course of foreign language major in universities. Through the combination of online and offline, the red boat spirit is introduced into foreign language classroom teaching, and the effective connection between the second classroom and the first classroom is emphasized, to enhance the foreign language students' recognition of the red ship spirit and promote the cultural self-confidence of the Big Country.

1. Introduction

Casting soul and educating people is a great project to train young students in the new era, [1] which combines the unique and valuable connotation of the red ship spirit with it, and greatly enriches the ideological resources of the project. [2] For the students who are learning a foreign language, they are greatly impacted by the foreign language culture, and they do not have a deep understanding of the red boat spirit and a high sense of identity, foreign language teachers also have great challenges in spreading the red ship culture. The combination of ideological and political education and foreign language teaching can enhance students' identification with the red ship spirit and promote their cultural confidence. For example, BingBing Peng, in his 2021 "An overview of the academic history and prospects of the study of the spirit of the red ship", mentioned the use of ideological and political education as the main front in foreign language teaching to innovate educational models, [3] make the best use of the position and value of the red ship spirit in ideology and politics. In the 2021 "The values of the times and the path of practice of the red boat spirit", MiJuan Xu wrote that the "Red boat spirit and the path of practice" should be applied to the work of cultivating people through the casting of souls in the new era, we should give full play to the guiding role of the red ship spirit in campus culture and create a red atmosphere; Explore the new era elements of the red ship spirit and enhance the young students' sense of identity; Add the contents of the Red Ship Spirit network education, broaden the channels of learning. [2] In the spirit of the red boat into the first classroom, do a good job in the second classroom and the first classroom link, both online and offline publicity. A country thrives when its youth thrive, and a country thrives when its youth thrive. Only by keeping talents from all walks of life in their own country and working hard for their own country can the goal of cultivating the youth of the four

youths be realized and the Chinese dream be realized.

The positive effect of learning red boat spirit on students' Ideological and political development.

The value of red ship spirit in foreign language ideological and political classroom teaching.

(1) Pioneering spirit of daring to be the first

Pioneering spirit is one of the connotations of the red boat spirit. The general secretary point out on May 4th, 2013 "Innovation is the soul of national progress, the inexhaustible source of a country's prosperity, and also the deepest national endowment of the Chinese nation. It is the so-called 'daily renewal, daily renewal, and daily renewal'. "It can be seen that the word "innovation" is very important for the nation. Being in the forefront of the times is the core feature of the red boat spirit, and the pioneering spirit is the key to being in the forefront of the times. [4] The pioneering spirit of pioneering and daring to be the first plays a leading role in Ideological and political teaching, and has a positive and positive leading role in students' Outlook on life and values. To realize the great rejuvenation of the Chinese nation requires the new youth to have the courage and courage to "dare to be the first", and the courage and perseverance to be selfless and indomitable. Chinese New youth grow up in exam oriented education, in the teaching of "no rules, no radius", and in various "rules", it is inevitable that some endowments will be bound and lack practical experience. In a relatively open university, students' ideas will be fully recognized. The initiative spirit encourages students to make unremitting progress, dare to be first, pursue excellence, and encourage students to dare to innovate and fight.

(2) A firm ideal and an indomitable spirit of struggle

The spirit of struggle is the guarantee to stay ahead of the times. [4] The general secretary point out in a book named "Closely focus on upholding and developing socialism with Chinese characteristics, study, publicize and implement the spirit of the 18th Revolutionary organization National Congress" "Ideals and beliefs are the spiritual 'calcium' of Communists. Without ideals and beliefs, if they are not firm, they will lack 'calcium' in spirit and suffer from rickets." After going through a tense and busy high school and coming to a free and loose university campus, students are relatively free to use electronic products and control their own lives at will. Teenagers will never waver in the face of various temptations from the outside world; In the face of the colorful world on the Internet, there are countless bandits; In the face of the outside lights, perseverance. All strive for the ideal and ambition in your heart. Teenagers who have just entered adulthood have encountered few difficulties, but for college students who have half stepped into the society, they will inevitably encounter difficulties of large and small numbers in the future. This requires college students to have the spirit of perseverance, not afraid of difficulties, repeatedly defeated and fought. In order to achieve the beauty in their hearts, they need to make unremitting efforts. The struggling spirit in the red boat spirit can provide the spiritual guidance of identification when college students are confused.

(3) The spirit of dedication of building the government for the public and being loyal to the people

The spirit of dedication is the foundation of walking ahead of the times. From the Three Kingdoms period, Zhuge Liang's "Dedicated, after death is already", to modern Lei Feng's "Own life, is to make others better"; From Su Xun's "Idle not mourn his death, but worry about the decline of his country" to Fan Zhongyan's "First worry about the world, after the world's joy and joy." Throughout the ages, there have been many famous epigrams praising people's selfless dedication. Red boats stand and walk by the water. Red boats and water are like the Revolutionary organization and the people. The creator of history is the people. The tenet of the Revolutionary organization is to always put the interests of the People First and serve the people wholeheartedly. [5] Under the background of the new era, college students should set up the spirit of dedication to serve the people, and learn from our ancestors.

2. Empirical Analysis

2.1. Questionnaire Design, Survey Methods and Interviewees

Around the two key words of red boat spirit and ideological and political teaching, we designed a series of questionnaire questions, "have you ever known the red boat spirit, can you accurately and quickly say the connotation and core of the red boat spirit, and do you have a certain understanding of the characters and deeds related to the red boat spirit", "Whether there are teachers who introduce the teaching contents related to the red boat spirit in Ideological and political classes, and whether foreign language teachers have mentioned the red boat spirit in the teaching process."

Considering the different class hours among the majors in the University and the limited energy of researchers, the questionnaire star app is used to directly distribute the questionnaire, so as to reduce the research cost and facilitate the subsequent data collection, making the data more accurate and rigorous.

Since the theme of this study is the realization path of the red boat spirit in Ideological and political teaching in foreign language classroom, foreign language classroom is also one of the key words, so the respondents of this questionnaire are mainly foreign language majors in our school.

2.2. Questionnaire Collection and Analysis

After the questionnaire is distributed, please complete the questionnaire for the students majoring in foreign languages, and then the research students will collect and sort out the information, and convert it into a fan-shaped statistical chart, so that people can see it at a glance, as shown in the Figure 1 to Figure 5.

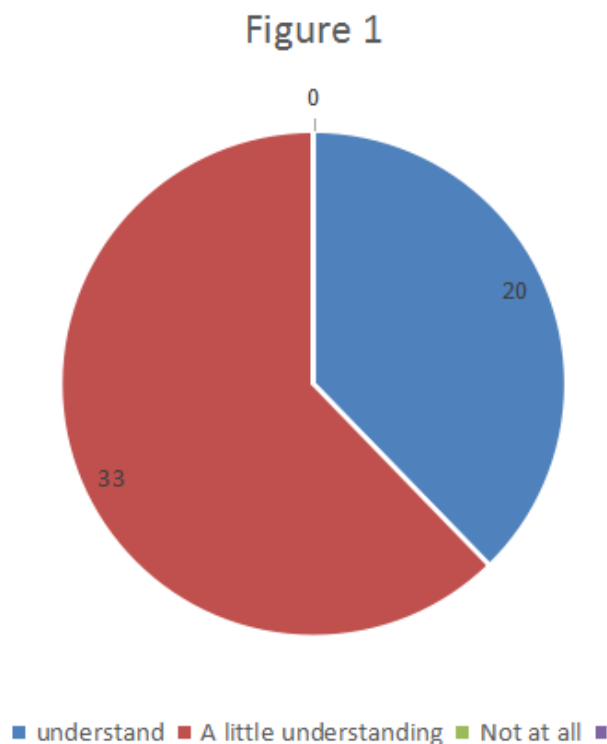

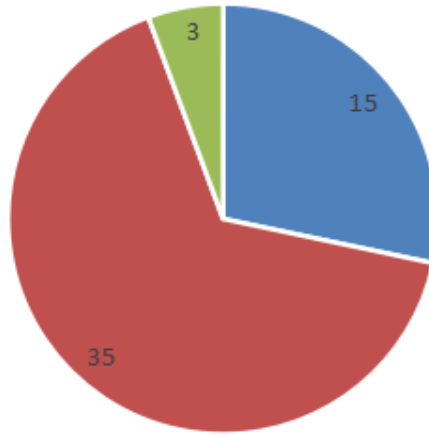

Figure 1: Have you ever known the spirit of the red boat?

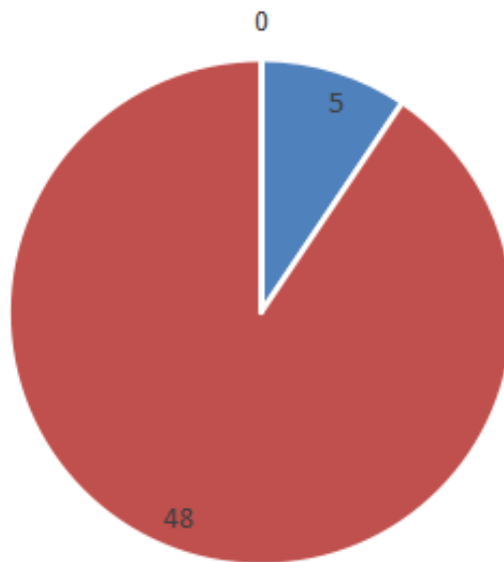

Figure 2

■ sure ■ It's a little difficult, but you can tell the general content ■ Not at all ■

Figure 2: Can you accurately and quickly say the connotation and core of the red boat spirit?

Figure 3

■ Well understood ■ a little ■ Not at all ■

Figure 3: Do you have a certain understanding of the characters and deeds related to the red boat spirit?

Figure 4

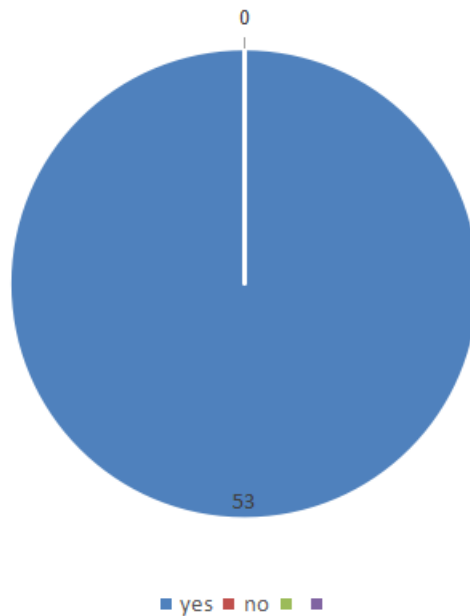

Figure 4: Is there a teacher who introduces the teaching content related to the red boat spirit in the ideological and political class?

Figure 5

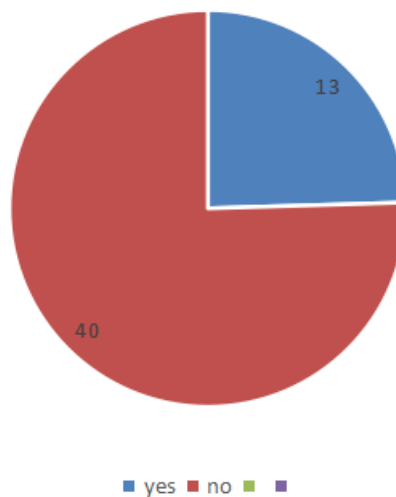

Figure 5: Has the foreign language teacher mentioned the red boat spirit in the teaching process?

2.3. Analysis Conclusions

As one of the important red spirits in China, the red ship spirit is not unfamiliar to college students, not to the point of asking three unknowns, but few people have a deep understanding, and few people are willing to understand it in depth; The red boat spirit has been mentioned in Ideological and political classes, but it is basically a Chinese teaching environment, and foreign language teachers rarely mention the red boat spirit in class. However, the spirit of the red boat can

be passed down as one of the red revolutionary spirits, which must have its advantages. In addition to students' taking the initiative to understand, schools should take the lead, and teachers should take the lead, especially students who study foreign languages. These students are easier to accept foreign cultures and feel the diversity of world cultures than students of other majors, so they should be encouraged to learn local spirit, Only those who do not forget their roots are qualified to talk about development, not to mention that the red boat spirit is a collection of cultural spirits worth learning and highly praised. Chinese students have a deep sense of national cultural pride. Schools should pave the way for students to learn, and teachers should be good leaders on this road.

3. The Teaching Practice Path of Integrating the Red Ship Spirit into the Foreign Language Ideological and Political Class

To integrate the red boat spirit into the foreign language classroom through ideological and political education, and to carry out propaganda and infiltration in various aspects, not only collecting materials for paper-based teaching in the first classroom, but also linking up with the second classroom, propaganda after class, enhance the memory of the students.

3.1. To Integrate the Red Boat Spirit into the First Class

"We must make good use of the 'big ideological and political course' and must combine it with the reality". To integrate the red boat spirit into the ideological and political teaching, we must not only combine the objective reality with the local characteristics, also choose suitable for the "Red ship spirit" content of teaching materials, relevant researchers Chengcheng Chen also pointed out that to comprehensive consideration of students, vary from person to person, teach according to aptitude. Pay attention to individual differences. Traditional education and teaching methods do not take into account the ideological and political education factors. Teachers should not only pay attention to inspiring and innovative "Teaching", but also pay attention to students' "Learning", guide students to feel the great feelings of "Red Ship Spirit", and guide students to pay attention to the times, society and country, absorb the "Red ship spirit" nutrients. [6]

3.2. Face-to-face Teaching

The red ship spirit is integrated into the ideological and political course, which requires us to excavate the depth of theory, extend the period of education, expand the course resources, and construct multiple platforms, it will further promote the formation of scientific thinking mode, behavior habit, belief power and deep-seated internalization ability of the contemporary youth, and cultivate the core socialist values of the youth. [7] Many scholars in our country advocate that the red ship spirit should be written into the textbooks, brought into the classroom and introduced into the mind. [8] In September 2018, the first set of local textbooks with the theme of "Red Boat Spirit" was launched in Jiaying to implement red moral education for primary and secondary school students. And, in the curriculum to arrange the red ship spirit as the theme of the class, to ensure that the spirit of red ship education into the classroom. College foreign language teachers can search for the essence of primary and secondary school students in the textbook, re-collate the translation, in the classroom for students to explain, so that students in-depth understanding of the spirit of the red boat. Face-to-face teaching with students, problems are raised at any time, difficulties are solved at any time, teachers' classroom teaching is the main place for college students to learn cultural knowledge and cultivate skills, face-to-face teaching is the traditional but most direct way to get students to accept knowledge, and the most effective way to learn. Foreign language teachers can also arrange exercises for students to discuss learning, to strengthen the spirit of the red boat

understanding. In the classroom, live translation, group writing competition and foreign language translation of red boat spirit can make red boat spirit successfully practiced in the foreign language ideological and political class.

3.2.1. Network Teaching

In today's information age, the network has become an indispensable part of People's life and learning. College students, in particular, use the internet far more frequently than other age groups. Therefore, foreign language teachers should use network means reasonably. Because the network is repeatable, and everyone's acceptance level and learning progress are different, so students can according to their own needs, by pausing, fast-forward and replay and other forms of repeated viewing of online courses to enhance memory, the appropriate teaching methods can also be twice the result with half the effort. At the same time, network teaching can reduce costs, can more reference to others teaching experience and methods, enrich the teaching ideas of teachers. [9] Researcher zhiwei Gong also proposed the "Two-way interactive problem-based" teaching method. Online teaching is also a good way for teachers to find people who are related to the spirit of the red boat, show the students relevant documentaries translated into foreign languages, and let the students summarize after watching them, select a few students to ask questions; Also can through the Internet questionnaire to grasp the students of the red boat spirit of mastery. Through the network teaching, teachers can also directly see the students on-line length, check-in situation, answer the situation, can quickly count out the difficulties of the students.

3.3. To Integrate the Red Boat Spirit into the Second Class

The second class is a student organization formed by college students according to their interests and hobbies, which is considered as the second major carrier of education outside the class. Foreign language teachers can provide support to these students and suggest activities to which students can volunteer.

3.3.1. Bring the Red Boat Spirit to Campus

To carry out various campus activities related to the spirit of the red boat, such as organizing students to attend lectures and reports related to the spirit of the red boat, so that students can take down key points in a foreign language; To carry out essay-writing activities on the theme of the red boat spirit, encourage students to participate and give small gifts to the winners; To organize stage plays, which are freely attended by students, independently planned and selected by themselves, to select the most successful works in students' minds; To organize voice-over competitions for students to interpret classic films related to the red boat spirit through voice-over in foreign languages; To encourage students to organize related group building independently; Discuss what I think I understand the spirit of the red boat, imperceptibly into the spirit of the red boat into the campus, into the hearts of students. Integrating the red ship spirit into the campus culture construction can not only enrich the campus life of students, but also promote the formation of a healthy and harmonious campus atmosphere of moral education, and help the government and the league to build and develop together, also can carry on the positive value guidance to the university student, promotes the student to the red spirit culture perception, strengthens the student's initiative spirit, the struggle spirit, the dedication spirit. Foreign languages need to always be ready to provide students with theoretical guidance for students to solve problems.

3.3.2. Bring the Red Ship Spirit out of the School Gate

In July 1921, the first Congress of Revolutionary organization was held in Jiaxing and later transferred to a painting boat in Nanhu. In this boat, solemnly proclaimed the birth of the Revolutionary organization, the ship set sail from the Chinese revolution. The “Red Boat”, a symbol of the origins of the Chinese Revolution, was a Chinese creation myth event in Chinese history. Integrating the red boat spirit into foreign language universities' ideological and political education classes will give Jiaxing the unique advantage of being able to organize students to travel to Nanhu to experience it on the ground. Or ask the staff of the Nanhu scenic spot if they can introduce the red boat culture to the students, or if they need student volunteers, so that the students can feel the red boat spirit better while doing volunteer work in Nanhu. Nowadays, international tourism is very popular. As a coastal city, Jiaxing is located in a traffic fortress. It has rich cultural characteristics and attracts many foreign tourists every year, foreign language teachers can also teach students about the spirit of the red boat, encouraging students to communicate with foreign tourists and find out whether people from different countries know about the spirit of our red boat, whether students can accurately convey the spirit of the red ship to foreign friends.

The limitation and future research direction of integrating the red ship spirit into the foreign language ideological and political classroom teaching

There are still some limitations in integrating the red ship spirit into the classroom of foreign language ideological and political education. The main limitation is that the practice path is not clear.

There are only 124 articles searched on the CNKI with the keywords of "red boat spirit" and "Ideological and political", indicating that there are few scholars studying this, and there are not many cases that can be used for reference. The concept of red boat spirit was formally proposed by the chairman in 2005. Since then, scholars studying red boat spirit have increased, but compared with other ideas, the development period is relatively short. Secondly, there are few published ideological and political books related to the red boat spirit, the expansion of the red boat spirit is less in the ideological and political books that students study, and the requirements for the red boat spirit are not high. Therefore, students' understanding of the red boat spirit is not deep enough, and there is great resistance for foreign language teachers to integrate the red boat spirit into the ideological and political classroom. Finally, there is little research on the connection between the red boat spirit and foreign language classroom on the Internet. Foreign language teachers not only need to collect materials, but also need to translate and sort them out, which is a heavy workload.

Therefore, in the future study of the red ship spirit into the foreign language ideological and political teaching path, schools should strengthen the red ship spirit of publicity, deepen the impression of students, so that students from the bottom of their hearts to increase the recognition of the red ship spirit.

4. Conclusion

The general secretary once said, "The beautiful water is vast, the red boat is still there; The times change, and the spirit is eternal." Research the realization path of integrating the red boat spirit into the ideological and political teaching in foreign language classes. Starting from the teaching value of the red boat spirit, through the integration of online and offline, the first classroom and the second classroom, find out the coincidence between the connotation of the red boat spirit and the ideological and political teaching of foreign language courses, select appropriate teaching materials, and combine the teaching of professional knowledge and skills with the ideological and political education of college students, so as to provide spiritual guidance for college students, Improve students' sense of identity and pride in the red boat spirit, innovate the educational content and

teaching methods of integrating the red boat spirit into the ideological and political education of foreign language courses, and build a systematic educational path. Foreign language majors in foreign language classes, textbooks contain foreign ideas and culture, is imperceptibly affecting college students. The spirit of the red ship is timeless, and its spiritual connotation will never be out of date. The red boat spirit provides spiritual food for students' spiritual world, and the pioneering spirit encourages students to implement it from beginning to end and bring forth the new. The spirit of struggle leads the students to persevere and persevere. The spirit of dedication calls on college students to be willing to contribute, patriotic and love the people.
