Keywords: As a professional basic course, fire-fighting technology training is a powerful guarantee to ensure the students' ability to complete the social emergency rescue and combat tasks, forming a synergistic effect to achieve the goal of "Teaching" and "Educating"

Abstract: fire-fighting Technology Training, course ideological and political, coordinated development In the social background of the New Era, China's higher education institutions are the training bases for talents under the leadership of the Communist Party of China. They should unswervingly hold high the banner of Socialist school-running, adhering to the educational policy of "All-round Education, all-round education, all-round education", to promote the coordinated development of college students' knowledge and skills and ideology and politics. The fire-fighting technique training is an important basic course for the fire command major of China Fire Rescue Academy. This course is a strong guarantee for the generation of the students' ability to complete the social emergency rescue combat mission, it plays an indispensable role in the process of professionalization and specialization of firefighting and rescue. Through learning, the students master the training methods and practical application of fire-fighting technology to achieve the application effect of speaking, doing, teaching and demonstrating. Skilled command of the necessary fire-fighting technology training, can do the next team can participate in the training group, on duty preparation, to meet the first post needs, to train qualified junior fire commanders should have the basic professional quality.

1. The necessity and significance of carrying out ideological and political education in fire-fighting technology training course

It is the basic problem of education to train who, how and for whom, and it is the basic standard to test all the work of colleges and universities. In order to carry out the basic task of establishing virtue and fostering people, we must integrate value-building, knowledge-imparting and ability-training. The fire-fighting technique training course is not only the foundation of fire-fighting training, but also an important basic skill in fire-fighting. It is especially important to carry out ideological and political education, all reflect the importance of ideological and political, team training, fast and skilled, accurate water out of the fire, are the collective embodiment of the tree. Therefore, it is necessary and important to carry out ideological and political education in the training course of fire-fighting technology.

1.1 The proper meaning of personnel training

Since the 18th National Congress of the CPC, the CPC Central Committee with Comrade Xi Jinping as its core has attached great importance to the ideological and political work in colleges and universities, comprehensively constructed the ideological and political work system in colleges and universities, and put forward a series of new ideas, new thoughts, new strategies and new measures. In 2020, the Ministry of Education issued the "Guiding outline of ideological and political construction of Higher Education Courses", which pointed out that the comprehensive promotion of ideological and political construction of courses is a strategic measure to carry out the fundamental task of moral education. To promote the construction of ideological and political education in a comprehensive way

is to guide the students with values in the teaching of knowledge and the cultivation of their abilities, and to help them form correct world outlook, outlook on life and values, which is not only the meaning of talent cultivation, but also the necessary content. This strategic move, affect or even determine the successor issues, affect or even determine the long-term stability of the country, affect or even determine the national rejuvenation and the rise of the country. The cultivation of talents in colleges and universities is a process of unifying the cultivation of talents and the cultivation of talents. In order to build a high-level talent training system, we must integrate the ideological and political work system, do a good job in ideological and political education, and solve the problem of “Two skins” of professional education and ideological and political education.

1.2 the fundamental task of Lituo

The ideology and politics of curriculum refers to the form of constructing the pattern of all-round, all-round and all-round education, which makes all kinds of courses and ideological and political theory courses go together and form a synergistic effect, it is a comprehensive educational idea to regard “Establishing morality and cultivating people” as the basic task of education. The introduction of ideological and Political Education into the teaching link of fire-fighting Technology Training Course makes professional knowledge and ideological and political study go in the same direction and form a synergistic effect. In the main task of shaping students’ mind, we should accomplish the educational goal of “Condensing knowledge in value communication and realizing value guidance in knowledge communication”.

1.3 value leadership of the correct three views

Fire-fighting technique training is an important basic course for fire-fighting command major in China fire-fighting and Rescue College. To be able to do the next team can participate in duty preparation, to meet the needs of the first post, to train qualified professional fire commanders should have the basic literacy. The application of ideological and political education in fire-fighting technology training course is the integration of ideological and political education, such as ideas, political views and moral norms, into the teaching of fire-fighting skills. According to the characteristics of the curriculum, we should attach equal importance to “Knowledge imparting” and “Value leading”, and deepen the reform in the objectives, content, structure and mode of the curriculum, integrating political identity, national consciousness, cultural self-confidence, personality cultivation and other ideological and political education orientation with the imparting of knowledge and skills inherent in the professional curriculum, and guiding students to establish a correct world outlook, outlook on life and values, to train the students as a fire fighter’s sense of responsibility and sense of mission, inspire the students to take on the national feelings and mission, and strive to be a qualified socialist builder and a reliable successor.

2. The feasibility of the application of ideological and political education in fire-fighting skill training course

The training course of fire-fighting technology is a professional basic course for the major of fire-fighting command, as well as a practical training course focusing on the training of students’ practical ability, the core of the course is to train the students to master the basic fire fighting skills and to adapt to the basic ability of the first team only and lead the team to train and act, therefore, the application of ideological and political education in this course is particularly important. To cultivate a good commander at the grass-roots level, we must first look at this person’s moral character, his ability to distinguish things, his ability to judge danger, etc., all of these should be obtained from the course ideological and political, only a flat and noble commander, to be able to complete the task of fire-fighting and rescue, so the application of course ideological and political in fire-fighting skill training is completely feasible and necessary.

3. The implement way of ideological and political education in fire-fighting skill training course

3.1 make clear the importance of ideological and Political Education and change the educational and teaching ideas

Teachers should give full play to their subjective initiative, actively change their ideas, change their old ideas, keep up with the times, actively excavate the ideological and political elements of this course, and combine the characteristics of this course, ideological and Political Education will be imperceptibly integrated into every class.

3.2 The excavation and analysis of “Ideological and political elements” in the content of fire-fighting skill training course

The selection of ideological and political materials is very important to put ideological and political education into practice. We should prepare lessons in advance, update the contents of the courses in time, dig suitable ideological and political elements, and introduce ideological and political cases close to life into the classroom.

The ideological and political elements in the fire-fighting skill training courses are as follows:

1. The traditional fire-fighting skill training courses are integrated with the values mission, the professional spirit and the idea of putting morality first, every action and decision in a fire-fighting and rescue operation is related to the life and safety of the crew members and the rescued persons. This fully demonstrates the commander’s selflessness and great love. This spirit should be cultivated through training, let the spirit of the tree into the hearts of students, take root and sprout, for the training of the first post of fire commanders to lay a solid foundation.

2. Through the training and teaching of fire-fighting techniques, the training and discussion of each drill method, from simple to complex, from easy to difficult, from failure to success, reflect and analyze the secrets of success and the secrets of fire-fighting and rescue and time running, to improve students’ identification ability and sense of responsibility, even rise to philosophy, explain the importance and necessity of ideological and political education in fire-fighting and rescue.

3. In the teaching and training of team car drill, commanders and firefighters of various ranks work together, unify their thoughts and form combat effectiveness, so as to shape the students’ values. Only unity and cooperation, do not abandon, constantly forge ahead, the ability to scale new heights. To be worthy of the love of the people, the trust of the Party and the trust of the general secretary, become “The party loyalty, strict discipline, Comancheria, dedicated to the People’s practitioner, the people’s lives and property security guardian.”

3.3 to form a diversified assessment system of the course

in the examination of the learning effect of the fire-fighting skill training course, there are not only the traditional assessment of the single-person and group drill, but also the relevant links of ideological and political education in the course. Such as the arrangement of relevant homework exchange discussion, such as “Preparation of operational command plan” “Mobilization deployment before deployment” and “Fire situation analysis and judgment command decision-making” and so on; in the final examination there are also a certain proportion of ideological and political education-related examination content, such as to do a pre-war mobilization, training in the safety of the principles of protection, the fire emergency response plan.
